

$^{253}\text{Lr-1}$

Isomerism was first established in ^{253}Lr by F.P.Hessberger et al. in 2001 at the Gesellschaft für Schwerionenforschung, Darmstadt, Germany (2001He35). Previously, the two half-lives had been reported in a conference proceeding (1999He11). The 1.32 s isomeric level by itself had been measured earlier (1985He22).
