

## $^{114}\text{In-1}$

Isomerism was first established in  $^{114}\text{In}$  by J.L.Lawson and J.M.Cork in 1940 at the University of Michigan, Ann Arbor, Michigan ([1940La07](#)). The 49.51 d isomeric had been measured earlier, however, the ground state was misidentified (4.1 h instead of 72 s) ([1937La05](#)).
