

$^{134}\text{Te-1}$

The 164.5 ns isomer of ^{134}Te was first observed in 1970 by W. John et al. at Livermore National Laboratory, Livermore, California ([1970Jo20](#)).

[1970Jo20](#) W. John, F. W. Guy, and J. J. Wesolowski, Phys. Rev. C **2**, 1451 (1970).
