

$^{234}\text{Pa-1}$

The 1.159 m isomer of ^{234}Pa was first observed in 1921 by O.Hahn at the Kaiser Wilhelm Institut für Chemie in Berlin-Dahlem, Germany ([1921Ha01](#)). This also represented the discovery of nuclear isomerism.

[1921Ha01](#) O. Hahn, *Naturwissenschaften* **9**, 84 (1921).
