

$\Delta\sigma/\sigma$ vs. E for $\ln(n, \text{tot.})$

Linear Axes:
Rel. Standard Dev. (%)

Logarithmic Axes:
Energy (eV)

Correlation Matrix

$\Delta\sigma/\sigma$ vs. E for $\ln(n,el.)$

Linear Axes:
Rel. Standard Dev. (%)

Logarithmic Axes:
Energy (eV)

Correlation Matrix

$\Delta\sigma/\sigma$ vs. E for $\ln(n,inel.)$

Linear Axes:
Rel. Standard Dev. (%)

Logarithmic Axes:
Energy (eV)

Correlation Matrix

$\Delta\sigma/\sigma$ vs. E for $\ln(n,2n)$

Linear Axes:
Rel. Standard Dev. (%)

Logarithmic Axes:
Energy (eV)

Correlation Matrix

$\Delta\sigma/\sigma$ vs. E for $\ln(n,\gamma)$

Linear Axes:
Rel. Standard Dev. (%)

Logarithmic Axes:
Energy (eV)
