

**Adopted Levels, Gammas**

| Type            | Author                    | History           | Citation | Literature Cutoff Date |
|-----------------|---------------------------|-------------------|----------|------------------------|
| Full Evaluation | Balraj Singh and Jun Chen | NDS 172, 1 (2021) |          | 31-Jan-2021            |

$Q(\beta^-)=3420$  11;  $S(n)=6828$  13;  $S(p)=13017$  10;  $Q(\alpha)=-5878$  12    [2017Wa10](#)

$S(2n)=11233$  12,  $S(2p)=24532$  9 ([2017Wa10](#)).

Other measurements:

[2009Ma47](#):  $^{238}\text{U}(^{136}\text{Xe},\text{F}\gamma)$ ,  $E=954$  MeV; measured prompt  $E\gamma$ , and  $\gamma\gamma$ -coin using Clara-Prisma spectrometer at LNL-Legnaro.

Detected first three  $\gamma$  rays of 213, 352 and 497 keV in the yrast cascade.

[2009Sh42](#):  $^{12}\text{C}(^{238}\text{U},^{100}\text{Zr}\gamma)$ ,  $E=1.45$  GeV; measured  $E\gamma$ ,  $(^{100}\text{Zr})\gamma$ -coin using VAMOS magnetic spectrometer for fragments at GANIL. Detected first five  $\gamma$  rays of 212, 351, 498, 625, and 739 keV in the yrast cascade.

Mass measurements: [2007Ri01](#), [2006Ha03](#), [2006Jo14](#), [2005Jo22](#), [2004Ri12](#), [2004Jo18](#): Penning-trap method at Jyvaskyla, all the papers are from the same group.

Theory references: consult the NSR database ([www.nndc.bnl.gov/nsr/](http://www.nndc.bnl.gov/nsr/)) for 110 primary references, 104 dealing with nuclear structure calculations and six with decay modes and half-lives.

| E(level) <sup>†</sup>  | $J^\pi$ <sup>‡</sup>            | XREF     | Comments   |
|------------------------|---------------------------------|----------|--|
| 4377.1 <sup>a</sup> 5  | (13 <sup>+</sup> )              | <b>E</b> | $J^\pi$ : 741.6 $\gamma$ to (11 <sup>+</sup> ); band member.   |
| 4440.5 <sup>b</sup> 4  | (13 <sup>+</sup> ) <sup>#</sup> | <b>J</b> | $J^\pi$ : 397.5 $\gamma$ to (12 <sup>+</sup> ) and 767.4 $\gamma$ to (11 <sup>+</sup> ); possible band assignment. |
| 5237.1 <sup>@</sup> 5  | (16 <sup>+</sup> )              | <b>J</b> | $J^\pi$ : 1032.3 $\gamma$ to (14 <sup>+</sup> ); band member.  |
| 6371.2 <sup>@</sup> 6  | (18 <sup>+</sup> )              | <b>J</b> | $J^\pi$ : 1134.1 $\gamma$ to (18 <sup>+</sup> ); band member.  |
| 7615.0? <sup>@</sup> 7 | (20 <sup>+</sup> )              | <b>J</b> | $J^\pi$ : 1243.8 $\gamma$ to (14 <sup>+</sup> ); band member.  |

<sup>†</sup> From least-squares fit to E $\gamma$  data, keeping the energy of the first 2<sup>+</sup> level fixed at 212.61 4, and assuming  $\Delta(E\gamma)=0.3$  keV when not stated.

<sup>‡</sup> For high-spin ( $J>5$ ) states, the assignments are essentially based on yrast type of population in high-spin studies (from SF decay studies) where ascending order of spins are expected as the excitation energy increases complemented by band associations.

<sup>#</sup> Probable band member with bandhead at 6<sup>+</sup> ([2006Hw04](#), [1995Du10](#)). Note that 5<sup>-</sup> bandhead was assigned in an earlier study from the same group ([1995HaZT](#)).

<sup>a</sup> Band(A): g.s. band. Proposed configuration= $\nu h_{11/2}^2 \otimes \nu 9/2[404]^{-2}$ , prolate structure ([2019Ur01](#)), same as for <sup>98</sup>Sr.

<sup>&</sup> Band(B): Band based on 331, 0<sup>+</sup>. Band assignment from [2006Hw04](#) and [2019Ur01](#) (also [2019Ur02](#)). Proposed configuration= $\nu 11/2[505]^2 \otimes \nu 9/2[404]^{-2}$ , oblate structure ([2019Ur01](#)), same as for <sup>98</sup>Sr.

<sup>a</sup> Band(C): Band based on 5<sup>(+)</sup> state. Band assignment from [2019Ur02](#).

<sup>b</sup> Band(D):  $\Delta J=1$ ,  $K^\pi=(6^+)$  band. Probable configuration= $\nu 9/2[404] \otimes \nu 3/2[411]$  ([2004Hu02](#), [2006Hw04](#), [1995Du10](#)). However,  $K^\pi=(5^-)$  is assigned by [1997Ha64](#) (also in [2006Hw01](#)) with configuration= $\pi 5/2[422] \otimes \pi 5/2[303]$ . On the basis of agreement of calculated  $(g_K-g_R)/Q_0=0.13$  with experimental value of 0.12 1, [2004Hu02](#) support 2-quasineutron configuration with  $K^\pi=6^+$  rather than the 2-quasiproton configuration with  $K^\pi=5^-$  which gives calculated  $(g_K-g_R)/Q_0=0.16$ .

<sup>c</sup> Band(E): Possible  $\Delta J=1$  band. Band assignment from [2006Hw04](#).

<sup>d</sup> Band(F): Band based on 4<sup>+</sup> state. Band assignment from [2019Ur02](#).

<sup>e</sup> Seq.(G):  $\gamma$  cascade based on (3<sup>+</sup>). Sequence assignment from [2019Ur02](#).
