

¹⁷⁶Yb(³⁰Si,F γ) 1998Ku22,1999Ho25,2012St13

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	S. Kumar(a), J. Chen(b) and F. G. Kondev		NDS 137, 1 (2016)	31-May-2016

1998Ku22: ¹⁷⁶Yb(²⁸Si,F γ) and ¹⁷⁶Yb(³⁰Si,F γ) E=145 MeV ²⁸Si, ³⁰Si beam was produced from the Vivitron accelerator at Strasbourg. Target was a 1.5 mg/cm² ¹⁷⁶Yb on a 15 mg/cm² Au backing. γ rays were detected with the EUROGAM2 array of 54 Compton suppressed HPGe detectors. Measured E γ , I γ , $\gamma\gamma$. Deduced levels, band structures.

1999Ho25: ²³⁸U(¹²C,F γ) E=90 MeV ¹²C beam was produced from the INFN tandem at Legnaro, Italy. Target was a 47 mg/cm² thick ²³⁸U. γ rays were detected with the Euroball III array of 15 clusters, 26 clovers and 30 tapered Ge detectors. Measured E γ , I γ , $\gamma\gamma$. Deduced levels, band structures.

2012St13: ¹⁶⁸Er(³⁰Si,F γ) E=142 MeV ³⁰Si beam was produced the XTU tandem accelerator at the Legnaro National Laboratory. Target was a 1.15 mg/cm² ¹⁶⁸Er foil evaporated on a 9 mg/cm² Au backing. γ rays were detected with the EUROBALL III array. Measured E γ , I γ , $\gamma\gamma$. Deduced levels, band structures.

[†] From a least-squares fit to E γ .

[‡] Based on the systematics and observed band structures, unless otherwise noted.

From Adopted Levels.

@ Band(A): Most likely the $\nu 3/2^- [541]$ ($h_{11/2}$), $\alpha = -1/2$ band.

& Band(B): Most likely the $\nu 3/2^- [541]$ ($h_{11/2}$), $\alpha = +1/2$ band.

^a Band(C): $K^\pi = 5/2^+$ band, $\alpha = +1/2$. Most likely a mixture between $\nu 5/2^+ [413]$ and $\nu 5/2^+ [402]$ Nilsson configurations.

^b Band(D): $K^\pi = 5/2^+$ band, $\alpha = -1/2$. Most likely a mixture between $\nu 5/2^+ [413]$ and $\nu 5/2^+ [402]$ Nilsson configurations.

[†] Transitions from positive-parity states are observed only in 2012St13 with $\Delta E\gamma = 1$ keV. The others are observed in 1998Ku22 and 1999Ho25 but without uncertainties given. The evaluators assigned $\Delta E\gamma = 1$ keV for these γ -ray energies based on comparisons of the γ -ray spectra with that in 2012St13.

[‡] Placement of transition in the level scheme is uncertain.
