

$^{127}\text{I}(\alpha,2n\gamma)$  1977Ch23

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	Janos Timar and Zoltan Elekes, Balraj Singh		NDS 121, 143 (2014)	31-May-2014

1977Ch23: E=28 MeV, natural target,  $\gamma$ ,  $\gamma\gamma$ ,  $\gamma\gamma(t)$ -coin,  $\gamma(\theta)$ ,  $\gamma(t)$ , excitation function.

Others:

1979Ga01 (also 1979GaZP thesis): high-spin levels in  $^{129}\text{Cs}$  studied using  $^{127}\text{I}(\alpha,2n\gamma)$ ,  $^{126}\text{Te}(^6\text{Li},3n\gamma)$  and  $^{122}\text{Sn}(^{10}\text{B},3n\gamma)$  reactions, but no data are presented, except that for half-life of 575-keV isomer.

1978De29: E=22 MeV; measured spin rotation in  $\gamma(\theta,H,t)$ . deduced g and half-life for 575-keV isomer.

E(level): level not included in Adopted Levels. A 658.3 $\gamma$  is placed from a level at 3291 keV; and a 659.0 $\gamma$  from 1890 level in Adopted dataset.

<sup>†</sup> From least-squares fit to E $\gamma$  data, assuming 0.3 keV uncertainty for each  $\gamma$  ray.

<sup>‡</sup> As assigned in 1977Ch23.

# Band(A): Band based on  $1h_{11/2,\alpha=-1/2}$ .

@ Band(a): Band based on  $1h_{11/2,\alpha=+1/2}$ .

& Band(B): Band based on  $5/2^+$ .

<sup>a</sup> Band(C): Band based on  $5/2^+,\alpha=+1/2$ .

<sup>b</sup> Band(c): Band based on  $5/2^+,\alpha=+1/2$ .

$^{127}\text{I}(\alpha, 2n\gamma)$  **1977Ch23 (continued)** $\gamma(^{129}\text{Cs})$ 

When only  $A_2$  is given,  $A_4$  is set to zero.

<sup>†</sup> Evaluators assign (E2) for positive  $A_2$  and (M1+E2) for large negative  $A_2$  values for  $E_\gamma < 500$  keV or so, assuming level half-life is less than 10 ns or so. Above this  $E_\gamma$ , (Q) and D+Q are assigned from  $\gamma(\theta)$  results. See also Adopted Gammas.

<sup>‡</sup> Total theoretical internal conversion coefficients, calculated using the BrIcc code (2008Ki07) with Frozen orbital approximation based on  $\gamma$ -ray energies, assigned multiplicities, and mixing ratios, unless otherwise specified.

<sup>#</sup> Placement of transition in the level scheme is uncertain.
