<sup>†</sup> Following 2002Sa02 statement: "For all but the weakest lines, energy errors are estimated to be about 0.2 keV", the lines with  $I_\gamma=1$  where assigned a  $\Delta E_\gamma=0.4$  keV, while the more intense ones a  $\Delta E_\gamma=0.2$  keV.

<sup>‡</sup> Intensities accurate to within 20% (2002Sa02).
