

$^{144}\text{Sm}({}^{13}\text{C}, {}^{14}\text{C}) \text{ E=66.72 MeV} \quad \textcolor{blue}{1975\text{Th09}}$ 

| Type            | Author                | History | Citation            | Literature Cutoff Date |
|-----------------|-----------------------|---------|---------------------|------------------------|
| Full Evaluation | E. Browne, J. K. Tuli |         | NDS 113, 715 (2012) | 31-May-2011            |

Measured:  $\sigma(E,\theta)$  (energy resolution 60-90 keV), DWBA analysis.

 $^{143}\text{Sm}$  Levels

| E(level) | $J^\pi$ <sup>†</sup> | $C^2S$ | Comments   |
|----------|----------------------|--------|--|
| 0.0      | $3/2^+$              | 4.0    | $C^2S$ : for normalization it has been assumed that $C^2S=4.0$ . |
| 108      | $1/2^+$              | 1.8    |  |
| 754      | $11/2^-$             | 11.1   |  |
| 1103     | $5/2^+$              | 3.4    |  |

<sup>†</sup> From Adopted Levels.
