

$^{148}\text{Sm}(\text{p},\text{d})$     **1974GrYX**

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	N. Nica and B. Singh		NDS 181, 1 (2022)	9-Mar-2022

E=20 MeV.

L-values are inferred from angular distributions at 22 angles from  $5^\circ$  to  $170^\circ$ . Values in square brackets were assumed by the authors in order to establish empirical  $\sigma(\theta)$  shapes for the determination of L values for the other levels. DWBA fits are in general poor.  $L(1221)=0$  is established by the forward peaking and the DWBA fit is good.

 $^{147}\text{Sm}$  LevelsEnergy resolution  $\Delta E \approx 30$  keV.
