 $^{158}\text{Gd}$  Levels

Model calculation that may be of interest: [1962Af01](#).

See  $^{158}\text{Gd}$  Adopted Levels for  $\mu$  values, including results from Coulomb excitation ([1983Ha24](#), [1991St01](#)).

Scheme is from [1993Su16](#), except 1517 level from [1981Mc06](#).

Most of the B(E2) $\uparrow$  values are from [1981Mc06](#) (based on the method given by [1958St32](#)).
