

$^{170}\text{Er}(\text{d},\text{p}) \quad \textbf{1969Tj01}$ 

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	Coral M. Baglin, E. A. Mccutchan		NDS 151, 334 (2018)	30-Jun-2018

**1969Tj01:** E(d)=12.1 MeV;  $\theta=60^\circ, 90^\circ, 125^\circ$ ; mass-separated enriched targets; measured E(level) (mag spect, FWHM $\approx$ 12 keV), angular distributions, differential cross sections.

**1968Ha10** report possible additional levels (37 above 2385 keV and approximately 12 below).

Others: **1968Ha10**, **1963Is01**.

All data are from **1969Tj01**, except where noted.

880 <sup>d</sup> 10	7/2 <sup>-</sup>	0.20	1682 10			

<sup>†</sup> Values adopted by **1969Tj01** from measurements at all three angles.  $\Delta E$  not reported, but  $\Delta E=10$  keV estimated by **1982Kr03**.

<sup>‡</sup> Authors' values from intensity patterns for rotational states, absolute cross sections, and  $\sigma(\theta)$ . See  $^{171}\text{Er}$  Adopted Levels for evaluator's assignments.

<sup>#</sup>  $d\sigma/d\Omega(\text{exp})/(3 \sigma(\text{DWBA}))$ ; calculated by evaluator (theoretical cross sections in **1969Tj01** used).

<sup>@</sup> **1969Tj01** suggest that the 378 and 616 levels are the J=9/2 and 13/2 members, respectively, of the 9/2[624] band. However, in the Adopted Levels, the 616 level is assigned instead As the 13/2 member of the 7/2[633] band, and a 971 level is assigned As the 13/2 member of the 9/2[624] band.

<sup>a</sup> May include component from 9/2<sup>-</sup> 1/2[510] state (expected at 977 keV).

<sup>b</sup> Band(A): 5/2[512] band.

<sup>c</sup> Band(B): 1/2[521] band.

<sup>d</sup> Band(C): 7/2[514] band.

<sup>d</sup> Band(D): 1/2[510] band (+ 5/2[512]  $\gamma$  vibration).

<sup>e</sup> Band(E): 3/2[512] band.
