

$^{180}\text{W IT decay (5.47 ms)}$ 

Type	Author	History	Literature Cutoff Date
Full Evaluation	E. A. Mccutchan	NDS 126, 151 (2015)	1-Feb-2015

Parent:  $^{180}\text{W}$ : E=1529.05 4;  $J^\pi=8^-$ ;  $T_{1/2}=5.47$  ms 9; %IT decay=100.0

An additional 67-keV transition depopulating the 1529.05-keV level is reported in  $^{176}\text{Yb}(^9\text{Be},5n\gamma)$ . However, no intensity is given for this transition.

$\alpha$ : [Additional information 1](#).
