[1988Bo08](#): E=200 and 500 MeV electron beams were produced from the linear electron accelerator ALS at Saclay. Momentum transfer range: 0.6 to 3.2 fm⁻¹. Measured $\sigma(\theta)$ from 30° to 65° (at 200 MeV) and from 25° to 74° (at 500 MeV). See also [1987Bo06](#) from the same group.
