[†] Calibration is based on 10 known levels in ^{239}Np ([1975Vo01](#)).

[‡] From [1975Vo01](#) based on angular distribution in ($^3\text{He},\text{d}$) and on the ratio of cross sections ($^3\text{He},\text{d}$)/(α,t).

From [1975Vo01](#) based on L values and on comparison of cross sections with DWBA calculations.
