Full Evaluation	Ninel Nica, Balraj Singh		NDS 113, 1563 (2012)	28-May-2012

Charge-exchange reactions.

**1985Dr06:**  $E({}^7\text{Li})=52$  MeV,  $E({}^{11}\text{B})=83$  MeV. Measured  ${}^7\text{Be}$  and  ${}^{11}\text{C}$  spectra using Enge split-pole spectrometer at  $10^\circ$  (lab) for  $({}^7\text{Li}, {}^7\text{Be})$  and at  $8^\circ$  for  $({}^{11}\text{B}, {}^{11}\text{C})$ , FWHM=110 keV for  ${}^7\text{Be}$  spectrum. Deduced mass excess.

 $^{34}\text{P}$  Levels
