

$^{176}\text{Yb}(^{36}\text{S},\text{X}):$ tentative 2005O104

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	Ninel Nica, John Cameron and Balraj Singh		NDS 113, 1 (2012)	31-Dec-2011

2005O104: $^{176}\text{Yb}(^{36}\text{S},\text{X})$ E=230 MeV, measured $E\gamma$, $I\gamma$, $\gamma\gamma$, (particle) γ coin. PRISMA-CLARA system. Four γ rays at 185, 827, 902 and 3291 keV shown in a gamma-ray spectrum without any placements.

 ^{36}S Levels

E(level)	J $^\pi$
0	0 $^+$
3291	
4193	
5020	
5205	

 $\gamma(^{36}\text{S})$

The placements are based on level schemes in other γ -ray studies.

E $_\gamma$	E $_i$ (level)	E $_f$	J $^\pi_f$
185	5205	5020	
827	5020	4193	
902	4193	3291	
3291	3291	0	0 $^+$
