

$^{40}\text{Ca}(\text{p},\text{d}),(\text{pol p},\text{d}) \quad 1993\text{Ma22}$

Type	Author	History Citation	Literature Cutoff Date
Full Evaluation	Jun Chen	NDS 149, 1 (2018)	1-Jan-2018

Reaction is (p,d), unless otherwise noted.

1993Ma22 (also **1989Ma16**): (pol p,d) E=65 MeV polarized proton beam was produced from the AVF cyclotron facility of the Research Center for Nuclear Physics, Osaka University. Target was 1.10 mg/cm² natural Ca. Reaction products were momentum-analyzed with the RAIDEN spectrograph (FWHM=25-30 keV) and detected with the focal plane detector system KYUSHU. Measured $\sigma(E,\theta)$, analyzing powers. Deduced Levels, J, π , L-transfer, C²S from DWBA analysis. Reported 80 groups up to 9505 level.

1972Ma23 (also **1972MaXL**): E=40 MeV proton beam was produced from the Grenoble variable-energy cyclotron. Target was 1 mg/cm² natural Ca metal foil. Deuterons were detected in a ΔE -E silicon counter telescope (FWHM=65 keV). Measured $\sigma(E,\theta)$. Deduced levels, L-transfer, C²S from DWBA analysis. Reported 26 groups up to 8310 level.

1975Ka10, 1973Fa10: E=185 MeV proton beam was produced at the Gustaf Werner Institute of University of Uppsala. Target was 35 mg/cm² natural Ca. Reaction products were momentum-analyzed with a magnetic spectrometer (FWHM=260 keV) and detected in a telescope of a plastic scintillator. Measured $\sigma(E,\theta)$. Deduced levels, J, π , L-transfers, C²S from DWBA analysis. Reported levels at 0, 2470, 2790, 3030, 3940, 4040, 4460, 5130, 5490, 6150, 6910, 7210, 7970.

Others:

1992Ma61: E=65 MeV. Measured $\sigma(\theta)$. DWBA analysis.

1989Ab01: (pol p,d) E=200 MeV. Measured $\sigma(\theta)$ and analyzing powers. Deduced levels, J, π , L, C²S from DWBA analysis for levels at 0, 2470 and 2800.

1984Sm04 (also **1980SmZY**): E=800 MeV. Measured $\sigma(E,\theta)$. DWBA analysis. Reported levels at 0, 2680, 3790, 5400, 6390, 7260, 7780, 10920, 17800.

1980Ho18: (pol p,d) E=65 MeV. Measured $\sigma(\theta)$ and analyzing power for ground state. DWBA analysis.

1980Oh06: E=51.93 MeV. Measured $\sigma(E,\theta)$. DWBA and CCBA analysis. Reported levels at 0, 3630, 3820, 3870, 3940.

1975Ro27: E=65 MeV. Measured $\sigma(E,\theta)$. Deduced C²S from DWBA analysis for g.s. and 2470 levels.

1969Ba05: E=156 MeV. Measured $\sigma(E,\theta)$. Reported levels at 0, 2500, 3300, 3900, 5100, 6100, 7400, 8300. Data were re-analyzed in Nucl Phys A 126, 97 (1969) which reports spectroscopic factors.

1968Ch22: (pol p,d) E=30.5 MeV. Measured $\sigma(\theta)$, analyzing powers. DWBA analysis. Reported levels at 0, 2470, 2800, 5130, 5480, 6150.

1968Ko11: E=33.6 MeV. Measured $\sigma(E,\theta)$. Deduced levels, J, π , L, C²S from DWBA analysis. Reported levels at 0, 2470, 2800, 3030, 5130, 5480, 6150.

1966Ej01 (also **1964Sa10**): E=55 MeV. Measured $\sigma(E,\theta)$. Reported levels at 0, 2500, 4100, 5100, 5400, 6200, 7600, 8500, 10400.

1965Gi02: E=27.5 MeV. Measured $\sigma(E,\theta)$. DWBA analysis. Reported levels at 0, 2470, 2800, 3030, 5130, 5480, 6150.

1964Ca02: E=30 MeV. Measured $\sigma(E,\theta)$. Reported g.s and 2650 levels.

1963Ka26 (also **1963Ka30, 1962Ka19**): E=40 MeV. Measured $\sigma(E,\theta)$.

1970Do10: analyzed $\sigma(\theta)$ in **1965Gi02**.

 ^{39}Ca Levels

Cross sections given in comments are from **1975Ka10** at 185 MeV.

10.9×10 ³ [‡] 3				
17.8×10 ³ [‡] 5				

[†] From 1993Ma22, unless otherwise noted. Uncertainty is not given in 1993Ma22; ΔE=10 keV is assigned based on FWHM=25-30 keV.

[‡] From 1984Sm04; width ≥500 keV.

[#] From analyzing powers in 1993Ma22. The assignments quoted by 1993Ma22 for levels without analyzing power data are given under comments. 1993Ma22 suggest that L=2 strength in 5-10 MeV excitation region is almost exclusively from d_{5/2}⁻¹ transfer corresponding to deeply-bound hole state.

[@] From 1993Ma22, extracted from DWBA fit to experimental differential cross section. Spectroscopic factors are for L+1/2 transfer when J^π is not established by analyzing power; values from other measurements are given under comments, if available.
