

³⁰Si(18O,p3nγ) 2005La19

| Type | Author | History | Citation | Literature Cutoff Date |
|-----------------|---------------------------|---------|------------------|------------------------|
| Full Evaluation | Jun Chen and Balraj Singh | | NDS 190,1 (2023) | 20-Jun-2023 |

2005La19: E=68 MeV ¹⁸O beam was produced from the VIVITRON accelerator at IReS in Strasbourg. Target was a metallic 800 μg/cm² thick ³⁰Si. γ rays were detected by the high-efficiency EUROBALL IV Ge-detector array in coincidence with the Recoil Filter Detector (RFD). Measured E_γ, I_γ, γ-recoil coin, γγ(DCO), γγ(lin pol). Lifetimes estimated with application of the Recoil Filter Detector.

[†] From a least-squares fit to γ-ray energies. For E_γ values without uncertainties except for those from level-energy differences (not used in the fitting), a ΔE_γ=0.3 keV is assumed for the fitting purpose.

[‡] From 2005La19, with spin assignments primarily from R_{DCO} information for transitions and parities up to 13⁻ level at 7092 fixed by linear polarization measurements of several intense transitions, unless otherwise noted. But no polarization are given in 2005La19. When considered in Adopted Levels, assignments are treated as tentative by the evaluators where supporting data are

³⁰Si(¹⁸O,p3n γ) **2005La19 (continued)**

⁴⁴Sc Levels (continued)

lacking.

Firm negative parity assignment suggested by **2005La19** on basis that the level then completes the unnatural-parity band. Parity change for this level would be hard to understand (authors' note).

@ From Doppler-Shift-Attenuation-Method (DSAM) (**2005La19**).

& Seq.(C): $\pi f_{7/2} \nu f_{7/2}^3$.

^a Band(A): Band based on 67.9, $\alpha=0$. Configuration= $\pi(d_{3/2}^{-1} f_{7/2}^2) \nu f_{7/2}^3$.

^b Band(a): Band based on 234.6, $\alpha=1$. Configuration= $\pi(d_{3/2}^{-1} f_{7/2}^2) \nu f_{7/2}^3$.

^c Band(B): Band based on 531.4, $\alpha=0$.

^d Band(b): Band based on 1006.5, $\alpha=1$.

$\gamma(^{44}\text{Sc})$

R_{DCO} values given under comments are extracted from coin spectra gated on known E2 transitions, unless stated otherwise.
