

$^{54}\text{Fe}(\text{d},\text{n}) \quad \text{1970Ha54,1974Co03}$

Type	Author	History Citation	Literature Cutoff Date
Full Evaluation	Huo Junde	NDS 109, 787 (2008)	30-Apr-2007

[1969Co10](#): E=10 MeV; enriched self-supporting target; pulsed beam; tof method, 25-meter flight path length; resolution \leq 1.5 ns; measured $\sigma(\theta)$, DWBA analyses (nonlocality, finite range).

[1970Ha54](#): E=5.8 MeV; enriched (92%) targets; neutron tof spectrometer, NE213 liquid scintillator, 1.2 ns overall time resolution (corresponding to 30-100 keV between 0-6 MeV excitation energies); measured $\sigma(E(n),\theta)$.

[1974Co03](#): reanalyzed unbound levels deduced by [1969Co10](#).

See also [1968Ok04](#), [1970Ni04](#), [1973LoZS](#), and [1976Lo09](#).

All data are from [1970Ha54](#), except as noted.
