[†] E(level)≤5023 keV from 1967Hi10, >6700 keV from 1966Br05, and the rest from 1966Ka04, except as noted.

[‡] From 1966Ka04.

[#] From 1966Br05.

[@] From 1971Ma16.

[&] Based on $\sigma(\theta)$ fits with DWBA. Values are from 1971Ma16 and 1969Pe02.

^a From DWBA. Values from 1969Pe02 and 1971Ma16, except as noted. Correlation of L-values from low resolution measurements and level energies from high resolution measurements may be incorrect for E(level)>3000.

^b From 1969Pe02.

^c Average value from 1969Pe02 and 1971Ma16.

^d 4612 level of 1966Br05 probably corresponds to level at 4620 since the values of these authors are approximately 8 keV lower than those of 1967Hi10.

^e From 1990Ta38.

^f From 1996De16.
