Full Evaluation	E. Browne, J. K. Tuli		NDS 114, 1849 (2013)	31-Dec-2012

$E({}^{32}\text{S}) = 143$  MeV. Detected discrete  $\gamma$  rays in coin with particle-like fragments. Deduced the spin-alignment parameter for  ${}^{60}\text{Cu}$  in coin with  $Z=15$  and  $14$  from the anisotropies of stretched E2 transitions ([1986Vi06](#)).
