
 $^{70}\text{Ge}(\text{p},\text{p}'),(\text{pol p},\text{p}')$ 1969Hi01, 1967Br10

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	G. Gürdal, E. A. Mccutchan		NDS 136, 1 (2016)	1-Jul-2016

1993Mo05: polarized beam, E=22.3 MeV, coupled-channel calculations for one-, two-phonon states.

1969Hi01: E=7.02 and 10 MeV. Scattered protons were detected using photographic emulsions placed at the focal plane of a magnetic spectrograph. FWHM=6 and 10 keV; measured $\sigma(\theta)$ for $\theta=50^\circ$ and 90° ; Hauser-Feshbach analysis.

1967Br10: E=11-12 MeV, FWHM=12 keV; measured $\sigma(\theta)$.

1970Cu03: E≈14.5 MeV, FWHM=70 keV; measured $\sigma(\theta)$, $\theta=20^\circ$ – 150° ; coupled-channel analysis.

1985Se05: E=11.5 MeV, incident beam polarized; measured $\sigma(\theta)$, $\theta=25^\circ$ – 165° ; and vector-analyzing power; coupled-channel analysis.

1986Ro08: E=22 MeV; measured $\sigma(\theta)$, DWBA and coupled-channel analysis. Reanalysis of data by 1992Ke07.

 ^{70}Ge Levels

J^π from 1969Hi01 based on a comparison with Hauser-Feshbach analysis are given in comments.

E(level) [†]	L [‡]	Comments
0.0		
1039 2	2	$J^\pi=2^+$. $\beta_2=0.25$ 2 (1992Ke07). $J^\pi=0^+$.
1215 2		$J^\pi=2^+$.
1707 2		$J^\pi=2^+$.
2156 3		$J^\pi=4^+$.
2160 3		$J^\pi=2^+$. E(level): the 2156 and 2160 levels form a doublet with an estimated separation of 3.4 keV 5 (1969Hi01).
2310 2		$J^\pi=0^+$.
2454 2		$J=(3)$.
2538 2		$J^\pi=(1,2^+)$.
2565 2	3	$J^\pi=3^-$; based on the large $\sigma(p,p')$ at 10 MeV for the 2565-keV level which suggests that it is the one-phonon octupole level. $\beta_3=0.265$ 20 (1992Ke07).
2809 2	4	$J^\pi=(4^+)$.
2890 2	0	$J=0$.
2948 2		$J=(2,1)$.
3049 2		$J^\pi=3^+$.
3062 2	4	$J^\pi=4^+$. E(level): energy separation of 3049 and 3062 levels is 12.5 keV 3 (1969Hi01).
3109 2		$J=(0)$.
3182 2		
3195 2	4	E(level): energy separation of 3182 and 3195 levels is 13.2 keV 4 (1969Hi01).
3242 2	4	$J=1$.
3296 2	4	
3316 2	1	$J=1$. E(level): probable doublet with $J=1$ for one member.
3336 2		
3345 2		
3351 2		
3419 2	5	
3428 2		$J^\pi=(5^-)$ from coupled-channel fit of 1970Cu03.
3432 2	3	
3456 2	4	
3483 2		$J=(1,2)$.
3489 2	5	$J=3,4$.
3563 3	4	
3570 3		
3581 3	3+5
