 $^{88}\text{Sr}$  Levels

E=90 MeV. Measured  $\sigma(\theta)$  for  $\theta=8^\circ-30^\circ$  using QDDM magnetic spectrograph and position sensitive gridded ionization chamber (FWHM $\approx$ 260 keV). Angular distributions are measured but are rather structureless.

E(level)  
0  
 $1.84\times 10^3$   
 $3.15\times 10^3$   
 $4.03\times 10^3$
