

$^{235}\text{U}(\text{n},\text{F}\gamma), ^{241}\text{Pu}(\text{n},\text{F}\gamma)$ 2012Mu08,2017Ur03,2017An15

Type	Author	History	Citation	Literature Cutoff Date
Full Evaluation	Jun Chen, Balraj Singh		NDS 164, 1 (2020)	15-Feb-2020

Includes $^{232}\text{Th}(^{18}\text{O},\text{F})$, $^{238}\text{U}(^7\text{Li},\text{F})$, $^{238}\text{U}(\text{n},\text{F})$, $^{239}\text{Pu}(\text{n},\text{F})$. Most data are from $^{235}\text{U}(\text{n},\text{F}\gamma)$ in 2012Mu08.

2012Mu08: $^{235}\text{U}(\text{n},\text{F}\gamma)$ E=thermal neutrons from the CIRUS reactor facility at BARC. Target was $\approx 5.1 \text{ gm/cm}^3 \text{ UAl}_3$ (17% enriched ^{235}U). γ rays were detected by two clover HPGe detectors equipped with anti-Compton shields, in coincidence mode. Measured E_γ , I_γ , $\gamma\gamma$ -coin. Deduced levels, isotopic yield, angular momentum distribution.

2017Ur03: $^{235}\text{U}(\text{n},\text{F}\gamma)$: measured $\gamma\gamma(\theta)$ and $\gamma\gamma$ (linear polarization) using PF1b cold-neutron facility at ILL-Grenoble reactor. For gamma detection, EXILL array containing eight large EXOGAM clover HPGe detectors were used. Deduced spins, parities, and multipolarities. Information about E_γ and I_γ values from this work is not available.

2017An15: $^{235}\text{U}(\text{n},\text{F}\gamma)$ and $^{241}\text{Pu}(\text{n},\text{F}\gamma)$: prompt-fission spectroscopy using incident neutrons from the PF1B cold neutron beam at the Institut Laue-Langevin (ILL) Grenoble. Measured E_γ , $\gamma\gamma$ -coin, lifetimes of the first 2^+ and 4^+ levels by fast-timing technique using the EXILL-FATIMA array consisting of eight EXOGAM clovers and 16 $\text{LaBr}_3(\text{Ce})$ scintillators. Deduced $B(E2)$ and compared with Interacting Boson model and Monte-Carlo shell-model calculations.

Others:

1998Ph04: $^{238}\text{U}(\text{n},\text{F})$ E=1.5-3.5 MeV. Measured yield.

1995GuZY: $^{239}\text{Pu}(\text{n},\text{F})$. Measured prompt γ .

1989AbZW, 1992PHZZ: $^{232}\text{Th}(^{18}\text{O},\text{F})$ and $^{238}\text{U}(^7\text{Li},\text{F})$. Measured $\gamma\gamma$ -coin, $\gamma\gamma\gamma$ -coin, yrast band observed up to 10^+ .

1988FiZV: $^{235}\text{U}(\text{n},\text{F})$ and $^{238}\text{U}(\text{n},\text{F})$. Measured prompt γ rays.

1976Po11: $^{235}\text{U}(\text{n},\text{F}\gamma)$ E=thermal. Measured ce, ce(t).

1973Kh05: measured ce.

1971Fo21: measured ce, yields.

Yield data per 100 fissions: 2.3 4 in $^{235}\text{U}(\text{n},\text{F})$ (1988FiZV), 0.8 in $^{235}\text{U}(\text{n},\text{F})$ (1971Fo21), 0.3 in $^{252}\text{Cf}(\text{SF})$ (1970ChYJ).

 ^{98}Zr Levels

E(level) [†]	J^π [#]	$T_{1/2}$	Comments
0.0@	0^+		
854.0 10	0^+	65 ns 10	$T_{1/2}$: from ce(t) (1976Po11).
1223.0@ 10	2^+	$\leq 4 \text{ ps}$	$T_{1/2}$: from fast-timing $\gamma\gamma$ -coin technique, and analysis by generalized centroid difference method (GCDM) (2017An15); mean lifetime $\tau \leq 6 \text{ ps}$ from $\tau \leq 10 \text{ ps}$ in $^{241}\text{Pu}(\text{n},\text{F}\gamma)$, $\leq 6 \text{ ps}$ in $^{235}\text{U}(\text{n},\text{F}\gamma)$. Due to the uncertainties in prompt response differences (PRD) and Compton background corrections in both the reactions, the lifetime of the first 2^+ state could not be determined precisely. This value can be compared with $\tau \leq 15 \text{ ps}$ in 2010Be30.
1436.16 $\frac{+}{-}$ 7	0^+		J^π : $\gamma\gamma(\theta)$ (2017Ur03).

1801.6 1		4292.46	6 ⁺	2490.0	6 ⁺	M1+E2	-0.77 12	Mult., δ : from $\gamma\gamma(\theta)$ and linear polarization data in 2017Ur03. Preferred $\delta(\text{E2/M1})$ value in 2017Ur03 from three possible values for $J(4292)=6$: -0.77 12, +0.17 8 or -0.80 14. Mult., δ : from (1801.6 γ)(1222.9 γ +620.5 γ +647.1 γ)(θ) and polarization data (2017Ur03); $A_2=+0.160$ 16, $A_4=+0.065$ 36 for $J(4292)=6$. No solution for $\delta(\text{Q/D})$ for $J(1802)=7$. But $\delta(\text{E2/M1})=+0.17$ 8 from $\gamma\gamma(\theta)$ in SF decay preferred by 2017Ur03. POL(1801.6 γ)=+0.4 15 from (1801.6 γ)(1222.9 γ +620.5 γ +647.1 γ). $\delta(\text{E2/M1})=-0.78$ 9 or +0.17 8 for $J(4292)=6$, $\delta(\text{E2/M1})=+0.38$ 6 or +2.3 3 for $J(4292)=7$ (2017Ur03).
2574.4 1		4165.18	1 ⁻	1590.78	2 ⁺	(E1)		Mult.: from $\gamma\gamma(\theta)$ and linear polarization data (2017Ur03); $\delta(\text{Q/D})=-0.03$ 3 from (2574.4 γ)(1590.9 γ)(θ): $A_2=-0.213$ 28, $A_4=+0.051$ 56 for $J(4165)=1$; $\delta(\text{Q/D})=+0.71$ 8 for unlikely $J(4165)=2$, and -0.18 4 for $J(4165)=3$.
2680.3 1		4271.11	1 ⁻	1590.78	2 ⁺	(E1)		Mult.: from $\gamma\gamma(\theta)$ (2017Ur03); $\delta(\text{Q/D})=-0.03$ 7 from (2680.3 γ)(1590.9 γ)(θ): $A_2=-0.28$ 7, $A_4=0.00$ 13.
2942.3 1		4165.18	1 ⁻	1223.0	2 ⁺	E1		Mult.: from $\gamma\gamma(\theta)$ and linear polarization data (2017Ur03); $\delta(\text{Q/D})=-0.01$ 1 from (2942.3 γ)(1222.9 γ)(θ): $A_2=-0.24$ 1, $A_4=+0.01$ 1 for $J(4165)=1$; $\delta(\text{Q/D})=-0.21$ 15 for unlikely $J(4165)=3$, and no solution for δ for $J(4165)=0$, 2 and 4. POL(2942.3 γ)=+0.2 1 from (2942.3 γ)(1222.9 γ), $\delta=-0.01$ 1. (2017Ur03).
3229.8 2		4452.58	1 ⁻	1223.0	2 ⁺	E1		Mult.: from $\gamma\gamma(\theta)$ and linear pol data (2017Ur03); $\delta(\text{Q/D})=+0.03$ 2 from (3229.8 γ)(1222.9 γ)(θ), $A_2=-0.29$ 2, $A_4=0.00$ 5 for $J(4452)=1$; $\delta(\text{Q/D})=-0.29$ 4 for unlikely $J(4452)=3$. POL(3229.8 γ)=+0.5 2 from (3229.8 γ)(1222.9 γ), $\delta=+0.03$ 2 for $J(4452)=1$, and $\delta=-0.29$ 4 for unlikely $J(4452)=3$ (2017Ur03).

[†] From 2012Mu08. Authors mention I_γ uncertainties of 5% to 25% depending on γ -ray intensity. Evaluators assign 5% for γ rays

$^{235}\text{U}(\text{n},\text{F}\gamma), ^{241}\text{Pu}(\text{n},\text{F}\gamma)$ [2012Mu08,2017Ur03,2017An15](#) (continued)

$\gamma(^{98}\text{Zr})$ (continued)

with $I_{\gamma} \geq 50$, 15% for $I_{\gamma} = 20-50$ and 25% for $I_{\gamma} < 20$.

[‡] Total theoretical internal conversion coefficients, calculated using the BrIcc code ([2008Ki07](#)) with Frozen orbital approximation based on γ -ray energies, assigned multipolarities, and mixing ratios, unless otherwise specified.

[#] Placement of transition in the level scheme is uncertain.
